S3 Compatible Online Data Archive Solution

TIMG's online data archive solution is cost-effective, S3 storage in New Zealand

In this digital world, data is growing exponentially. Due to data retention policies, organisations are required to keep data for up to 10 years or even indefinitely.

Questions which organisations must answer are:

- How do you retain data and is it cost effective?
- Are you able to retrieve data on time and is this easily accessible?
- Who do I trust to protect my data?

TIMG proudly delivers S3 storage right here in New Zealand, for only \$0.02GB/month*!

This is supported by enterprise grade hardware, N+2 redundancy and a promise that your data is sorted locally in New Zealand - giving you 24/7 access. TIMG have actively protected customer data and information for 40 years and provide a cost effective solution to the highest standard.

TIMG SINGLE-SITE STORAGE

- TIMG standard S3 storage
- Data stored in one site - Auckland
- N+2 storage redundancy
- N+1 network redundancy
- \$0.02 per GB [minimum 500GB per month]
