

# **TIMG SCAN ON DEMAND**

## EASY, SECURE, DOCUMENT CONVERSION

In times of business disruption (such as a global pandemic), TIMG's secure document conversion services can help minimise the impact on your day to day operations.

In recent days, we have had several clients admit that they were unprepared for the COVID-19 crisis that is unfolding around New Zealand at present. Some customers now have no access to their physical documents and have stated that in hindsight they wished they had previously digitised their files and information.

When business continuity plans are activated you may have:

- Employees that are required to work from home but who still require access to physical documents that are stored offsite by a third-party provider
- Physical files that cannot be accessed by your team as they cannot be relocated from the office environment for security reasons
- Physical documents that cannot be accessed regularly by multiple individuals at a time.

To ensure that each of these scenarios are mitigated, TIMG can deliver a range of secure document imaging and e-Discovery options. Give your people quick, easy, 24/7 access to all the business information they require, at the click of a mouse.

#### BENEFITS OF DOCUMENT DIGITISATION

 Reduce inefficient paper based processes

2. Access files quickly and securely

3. Decrease time spent on manual data entry

### **FILE DIGITISATION**

Easily convert your business files and records to digital images and associated metadata:

- Digitisation of historical files and records, ongoing or newly created files, or a combination of both
- Quickly access information from stored documents
- Reduce manual searching and retrieval of files and documents
