

THE INFORMATION MANAGEMENT GROUP

Search for text in a document or email...

TIMG OpenDiscover

FIND YOUR DOCUMENTS INSTANTLY

Enable deep knowledge discovery and instantaneous access to your electronic archives. Search within scanned documents and images with powerful optical character recognition software. Manage security with access control lists to maintain organisational knowledge groups.

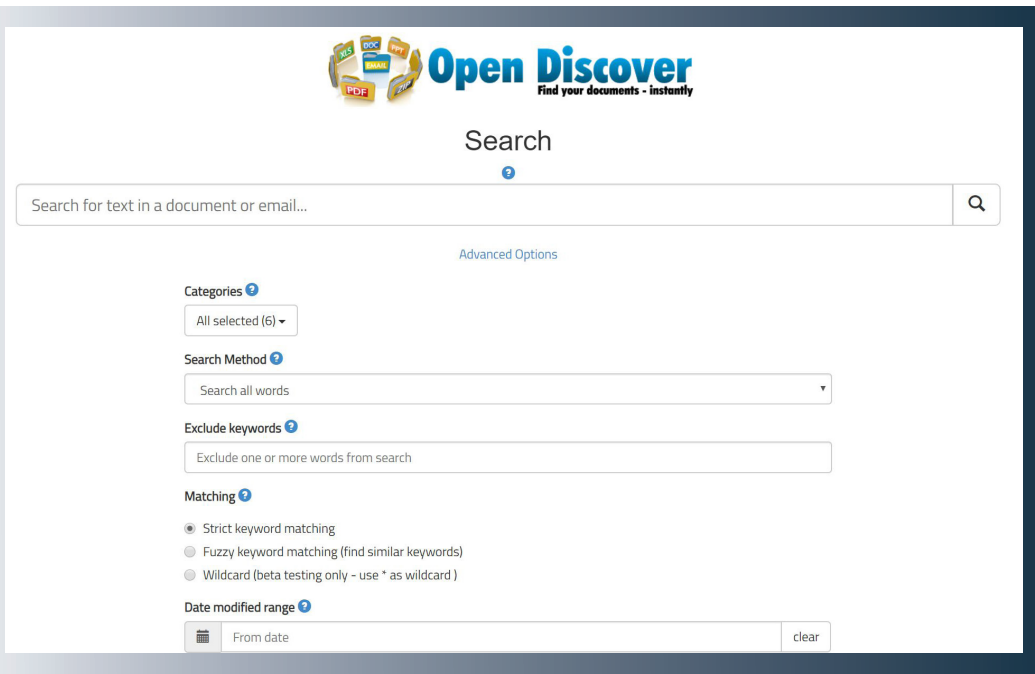

TURN YOUR DOCUMENT ARCHIVES INTO AN ASSET.

Enable instantaneous searching of:

- Word documents
- Emails
- Spreadsheets
- PDFs
- Images

ACCESS.

ACCESS ELECTRONICALLY STORED INFORMATION (ESI) - eDiscovery

Individuals and businesses produce vast amounts of ESI [Electronically Stored Information] which can be duplicated and stored on various devices. eDiscovery platforms bring large volumes of ESI under control quickly, accurately and cost-effectively. Using a combination of proven industry standards and in-house software applications, metadata and electronic files are processed in formats that make it easy to understand and utilise.

[eDiscovery applications and technology enable businesses to pull information and records from the massive volumes of content that span the enterprise.](#)

FEATURES OF TIMG'S eDiscovery SERVICE: OpenDiscover

- Bring large volumes of ESI under control quickly, accurately and cost effectively.
- Uses a simple Google-type search to find relevant documents quickly and with ease. Accessed online, you can utilise OpenDiscover anytime or anywhere.
- Any type of text-based file can be included, whether it is an email or a MS Office document from almost any source. All images will be converted to a readable format using our industry leading Optical Character Recognition [OCR] engine.
- Complete transparency through log reports.
- Full management of user controls and rights.
- Fully rebrandable with your logo.
- A cost effective solution compared to enterprise versions, whilst still providing the same performance.
